DISSONANCE

DISSONANCE PENDANT

A Sculptural Exploration of Form and Material

The Dissonance Pendant is an exceptional lighting piece that merges intricate craftsmanship with artistic expression. Made from cast metal and brass, this pendant embodies a refined balance between structure and fluidity. The ceiling fixture is meticulously crafted from cast brass, anchoring the piece with a sense of permanence, while a robust cast chain suspends the central form with effortless grace.

At its core, a finely woven metal mesh basket serves as the focal point, creating a striking interplay between transparency and solidity. Within this intricate enclosure, suspended oval cast figures subtly disrupt the geometric precision of the mesh, adding a sense of movement and depth. The Dissonance Pendant is more than a lighting element—it is a sculptural statement that redefines spatial harmony, making it a captivating addition to any curated interior.

About the Designer: Vasco Pintado

Vasco Pintado is recognized for his exceptional ability to blend traditional craftsmanship with contemporary elegance. His work transcends mere functionality, transforming lighting and furniture into sculptural masterpieces. Drawing inspiration from the interplay between organic materials and refined design, Pintado creates pieces that elevate any space, offering a perfect balance of sophistication and artistic expression. His dedication to quality and innovation is evident in every creation, making each piece a unique statement.
